

PART 2 - THE NOTION OF UNITY

Who Are We?

Essentially, ²Spirituality & Science are revealing that we & everything around us are all made of the same stuff, i.e. energy vibrating, sub-atomically, at different frequencies, an energy which, after The Big Bang, became 'clumped together' into constellations, solar systems and planets.

Thus, it is out of this 'solid matter' that we humans arose and, over the aeons, have evolved into our present condition.

In The Beginning

So, where did this energy come from? The Prime Source, First Cause, The Creator, is the 'gnostical' reply uncovered, which some people still call 'God', but not in its supernatural, existing-out-there, made-in-the-image-of-man sense but in that which is all-encompassing and ubiquitous.

Main Reason

Then, why did 'God', that 'Glorious Originating Dimension', explode out of nothing in order to form the cosmos? The answer given is so that It might experience Itself in all of Its Glory in the material realm. For, although It knows conceptually that It is Glorious, what It longed for was to know this feeling, experientially. And, the way in which It does this is through us, Its spiritual offspring. Hence, It 'drummed up' and, then, created, at the time of this massive explosion, the universe, both the visible and the invisible.

A Tri-Part Being

The latter It achieved, we are told, by dividing Itself into an infinite number of 'units', some of which incarnate on this planet into human form, i.e. as you and me, male and female. And so, in addition to a body and a mind, each of us has a soul.

Why Are We Here?

The sole aim of the soul, therefore, is to evolve, a task we are able to carry out, if we choose, by 're-presenting the grandest version of the greatest vision of ourselves' in relation to all of the events, people and conditions we attract to ourselves during each lifetime.

Latest Thinking

Thus, this enhanced perspective, is 're-minding' us that Life is 'G.O.D.', physicalised & metaphysicalised; that we are not apart from 'G.O.D.' but are a part of It; and that, since we and everything around us are all interconnected, interdependent and interrelated, 'We Are All One'!

A Rogue Planet

But, if we are 'the children of G.O.D.' and It is so magnificent, why is not paradise, i.e. Heaven, already here on Earth?

The response to this question is simple. When we take up a new existence in the material realm, we forget Who We Are & Why We Are Here. Believing, therefore, that we are separate from each other, our surroundings & 'G.O.D.' and that we have to compete for what we think we need to be happy, many of us - mostly men? - behave in a conflictual and aggressive manner.

So it is that, having lived in this ethos of fear, division and perceived scarcity for thousands of years (and become mostly arranged into pyramids of wealth and power), we have undergone so much pain, fighting and destruction and been brought by this limited outlook to our present condition, i.e. heading towards the edge of an abyss and, perhaps, beyond.

An Awakening Species

Then, how can we, as a species, escape from this predicament? Again, the reply is

simple & it is by each of us 're-membering' Who We Are, Why We Are Here and becoming once again a member of the whole. Hence, the re-cognition (knowing again) of 'The Notion of Unity' is vital. For, once it enters 'The Collective Consciousness', it will have many beneficial outcomes.

A More Advanced Society

In particular, it will end all division (not differences); it will usher in the amendment of practices which are damaging us & the planet; & it will lay the cultural foundations for the introduction of a sustainable world, involving a more mature, evolved method of organising human affairs, i.e. 'Gnostic Anarchism'! Thus, it could turn an unpleasant and oppressive breakdown, including the possible collapse of civilisation, into a welcome, liberating & healthy breakthrough! (Parts 3, 4 and 5)

²See, for example, 'Conversations with God', N. D. Walsch, and 'My Stroke of Insight', J. Bolte Taylor.
