

PART 3 - UNITY IN PRACTICE

Re-Building The Present Global 'Order'

Further to these ends, therefore, a number of geopolitical "changes in direction" may well be implemented (references available, end of Part 7), even as 'The Concept of Oneness' is entering hearts and minds everywhere, such as:

the establishment, in all countries of The Earth, of 'OWT' Parliaments and, then, in a suitable location, one which is Global (in place of 'The United Nations' which is "beyond repair");

the foundation of an 'OWT' Court of Law "whose decisions are binding to settle disputes, other than, as now, by military might & killing, a sure sign of our current, extraordinary immaturity";

the maintenance of an 'OWT' peace-keeping force "to guarantee that no

Nation can ever aggress upon another";
the granting of permission for each State to "keep its internal peace-keeping police force" - for the time being³;
the gradual & eventual dismantling of all national armies, accompanied by the redeployment of their personnel & the transfer of the vast amounts of money saved for humanitarian purposes;
the making of arrangements for "the reconciliation of all previous divisions between individuals, groups & countries by initiatives & projects involving restoration, reparation and reunification";
the encouragement of all religions "to examine their holy scriptures, retain that which is in keeping with the latest spiritual and scientific understandings, and, therefore, become rejuvenated" & hence, 'at one' with each other;

the voluntary contribution of a percentage of earnings each year to an 'OWT Compensation System' to be used for "the support of programs and services of the government, as voted by the people";

the introduction of transparency into all financial dealings "so that everyone might know everything about everybody's money situation"

the setting of a min/max wage/salary with contributions above the upper limit to a World Charitable Trust in the name of the contributor "so all the world would know its benefactors";

the replacement of all existing currencies by an international, 'OWT', monetary system, "based on a system of Credits & Debits, that is wide open, totally visible, immediately traceable & completely accountable";

"the allocation to each Nation of an equal, proportionate share of the world's resources";

the absorption of all property into 'Community Registration, Stewardship and Caression' (as proposed in Part 4.)

A Cooperative World and More!

Thus, should these and any similar amendments be made, involving a change to 'The Rules', not only would a united, caring & sharing planet be created but also an enlightened civilisation, capable of introducing ⁴'A More Advanced Society', which does not require, for its long term existence, the use of imposed control and its attributes, such as force and violence.

³until we have all 'grown (up) and become self-regulated.'

⁴Currently, we live in a civilisation which is in the first stages of its evolution. For example, we watch children starve to death and do very little about it; we settle our most serious disputes by killing each other; and, we are destroying our home environment upon which we depend for our existence in the material realm. Only 'a primitive society' would do such things!
