

## PART E - IMPLEMENTATION

### An Elevated Civilisation

Accordingly, over a period of time (of a decade or so?), a healthier, more advanced society (in every sphere of Life, not just technologically) will come into existence (perhaps, capable of lasting for many, many years), entitled 'Community-Based Self-Governance in A United and Re-Schooled World'!

### An OWT Party

But how might these <sup>3</sup>progradical adaptations be brought about in practice? There is only way, imho, in which these concrete 'Ideas of Change' could be peacefully and successfully achieved and that is by democratic means.

Thus, a suitable political association

would first need to be formed ubiquitously, the main purpose of which will be to use the system in order to change it, to gain positions of power and control in order to dismantle and get rid of them - perhaps, in the ways suggested (after which, having overseen this <sup>4</sup>glocal transition, it would, for the most part, be disbanded?)

But, wherever this <sup>5</sup>'r/evolutionary' organisation is created and voted into office (and whatever its name), it will always promote 'The Notion of Unity.' For, without this change of consciousness, there can be no change of circumstance! (See Conclusion.)

<sup>3</sup>progradical - prog(ressive)+radical, <sup>4</sup>glocal - global+local,  
<sup>5</sup>r/evolutionary - for speeded up development
