

PART 7 - THE CHOICE IS OURS!

In This or That Direction

So, there you have it. Either we, the temporary residents of this planet, wherever we live and undergo a local identity, 'wake up', having re-remembered Who We Are & Why We Are Here, and decide, as world citizens who have lost faith in the existing system, that 'progradical amendments to our primitive civilisation' - perhaps, as suggested here - be democratically made as soon as possible!

Or we, the majority of the human race, stay 'asleep', i.e. spiritually unaware and politically naive, and, while remaining, for the most part, assembled into pyramids of wealth & power, in which the top is moving inexorably away from the bottom, enable, willingly or otherwise, totalitarian Nation States (overt or covert) to become established, globally, in order to impose order &

control over the rapidly deteriorating, social and environmental circumstances, at present, developing here on Earth?

The Brighter Option

I know which of these long term, big picture goals/destinations, I would choose & vote for, i.e. 'Unity in Practice &, then, Self-Governance' and, thus, a once more, functional state of affairs on this planet!

Hence, the 'Ideas of Change' being put forward here - which with your help and support? - could soon create 'A United, Sustainable, More Advanced Society' on this planet!
